National Service

Welcome To DMS Laser Profiles

DMS Laser Profiles was established to provide sub-contract laser cutting services to clients across the South of England. The company operates from a modern, well-equipped factory of approximately 6000 square foot, which is strategically situated in Maidenhead, Berkshire.

In response to opportunities in today 's competitive market place DMS has invested in the latest laser cutting equipment including a Trumpf TRUMATIC L2530 (4 KW) and a Trumpf 3030

We can laser cut steel plates up to 3m long x 1.5m wide and cut mild steel to 20 mm thick, stainless steel to 15mm thick and aluminium up to 8mm thick as well as make laser cuts and insertions as small as 0.1mm.

For more information please call us.
